

# Master in Artificial Intelligence

## Data Collection & Preprocessing IV

# Purpose

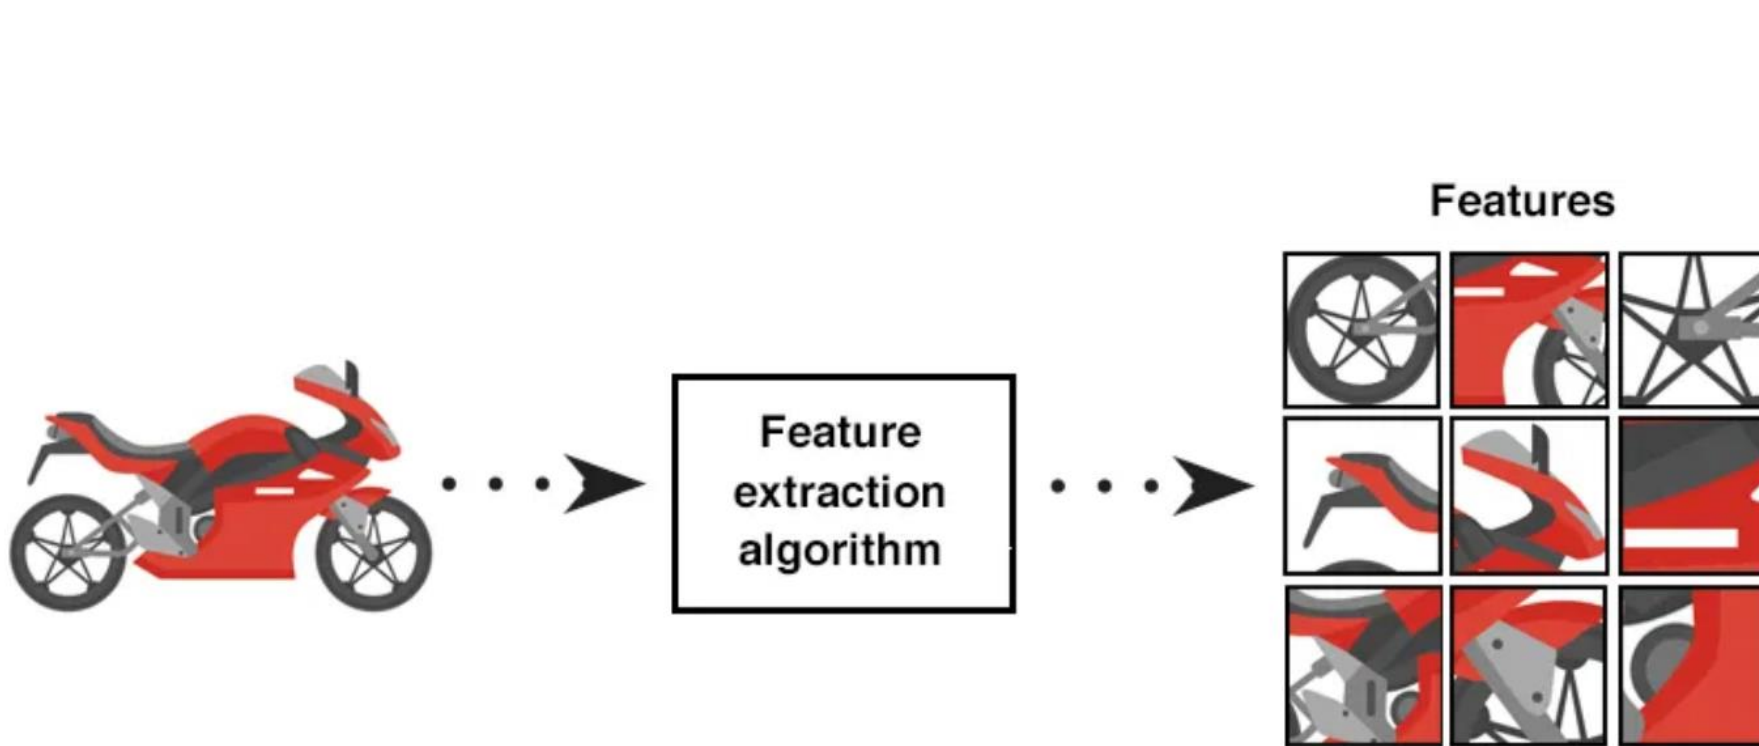

**The purpose of the section is to help you learn how to collect and preprocess data to become a Successful Artificial Intelligence (AI) Engineer**

**At the end of this lecture, you will learn the following**

- **How to gather relevant data from various sources, ensure its quality, and preprocess it to make it suitable for analysis and modeling**

# Image feature extraction algorithms

# Histogram of Oriented Gradients (HOG)

Input image

Histogram of Oriented Gradients

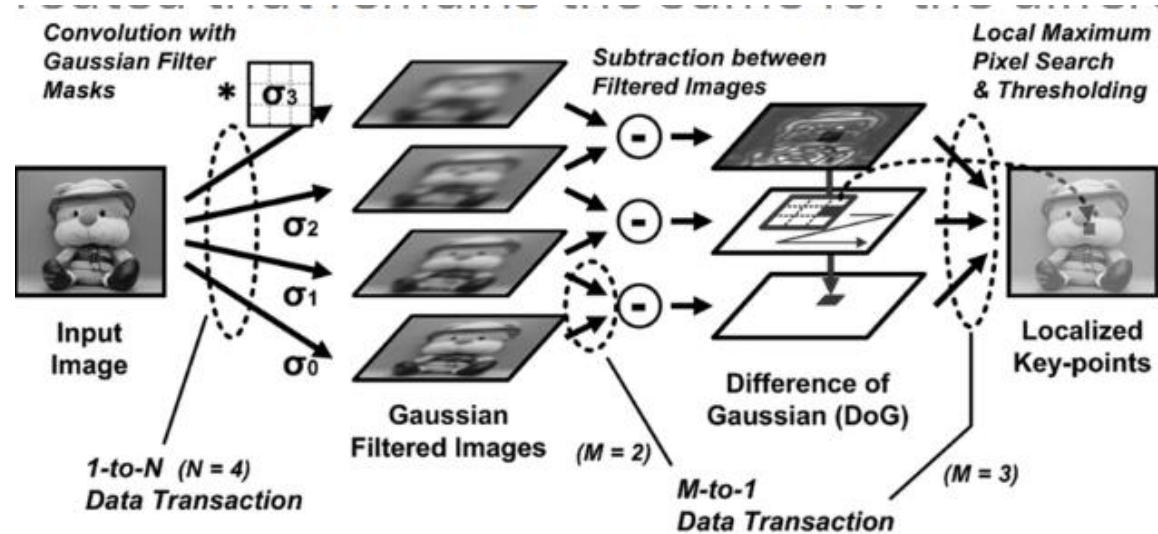

Credit: [iq.opengenus.org](http://iq.opengenus.org)

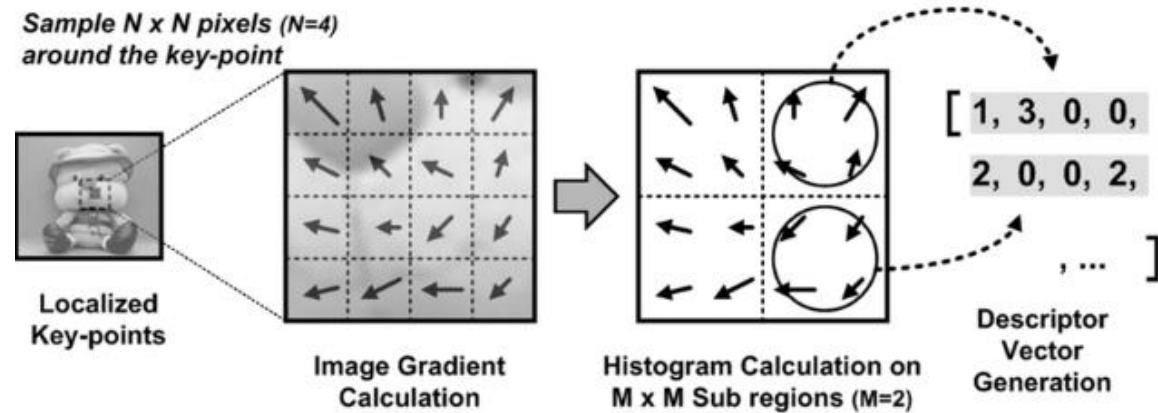

# Scale-Invariant Feature Transform (SIFT)

(a)

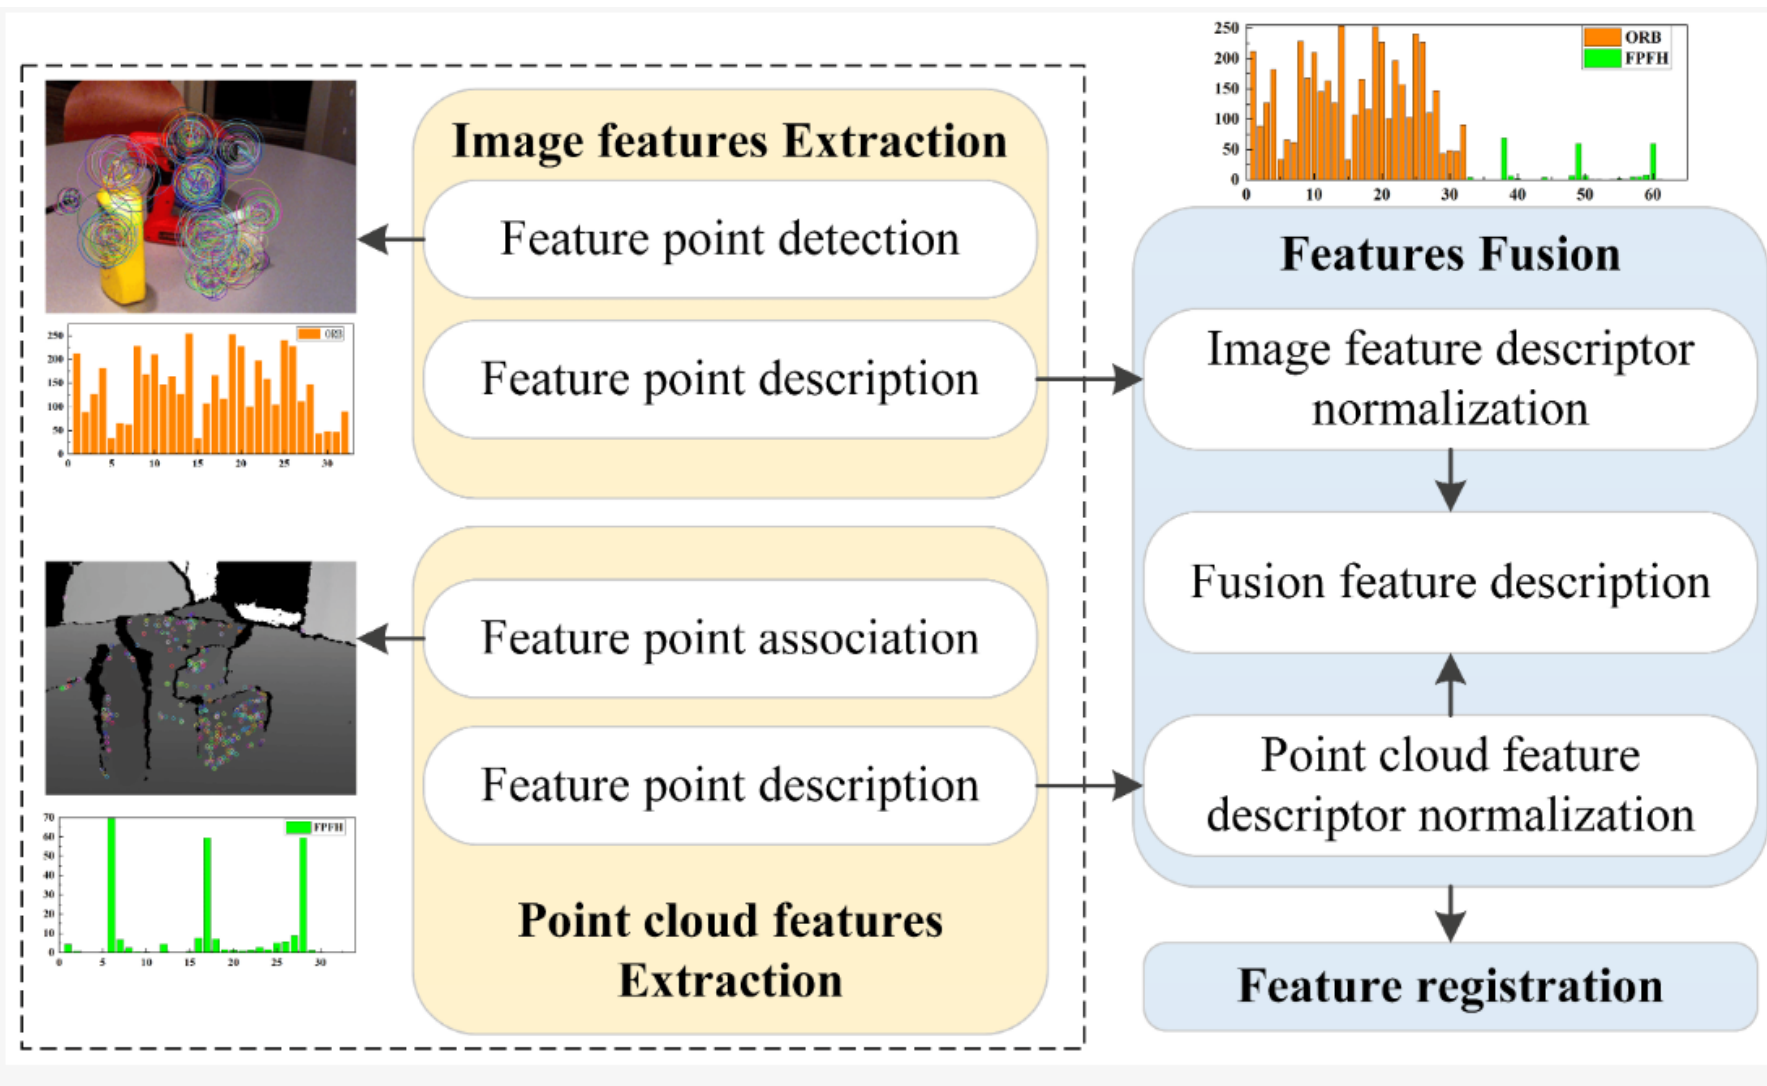

(b)

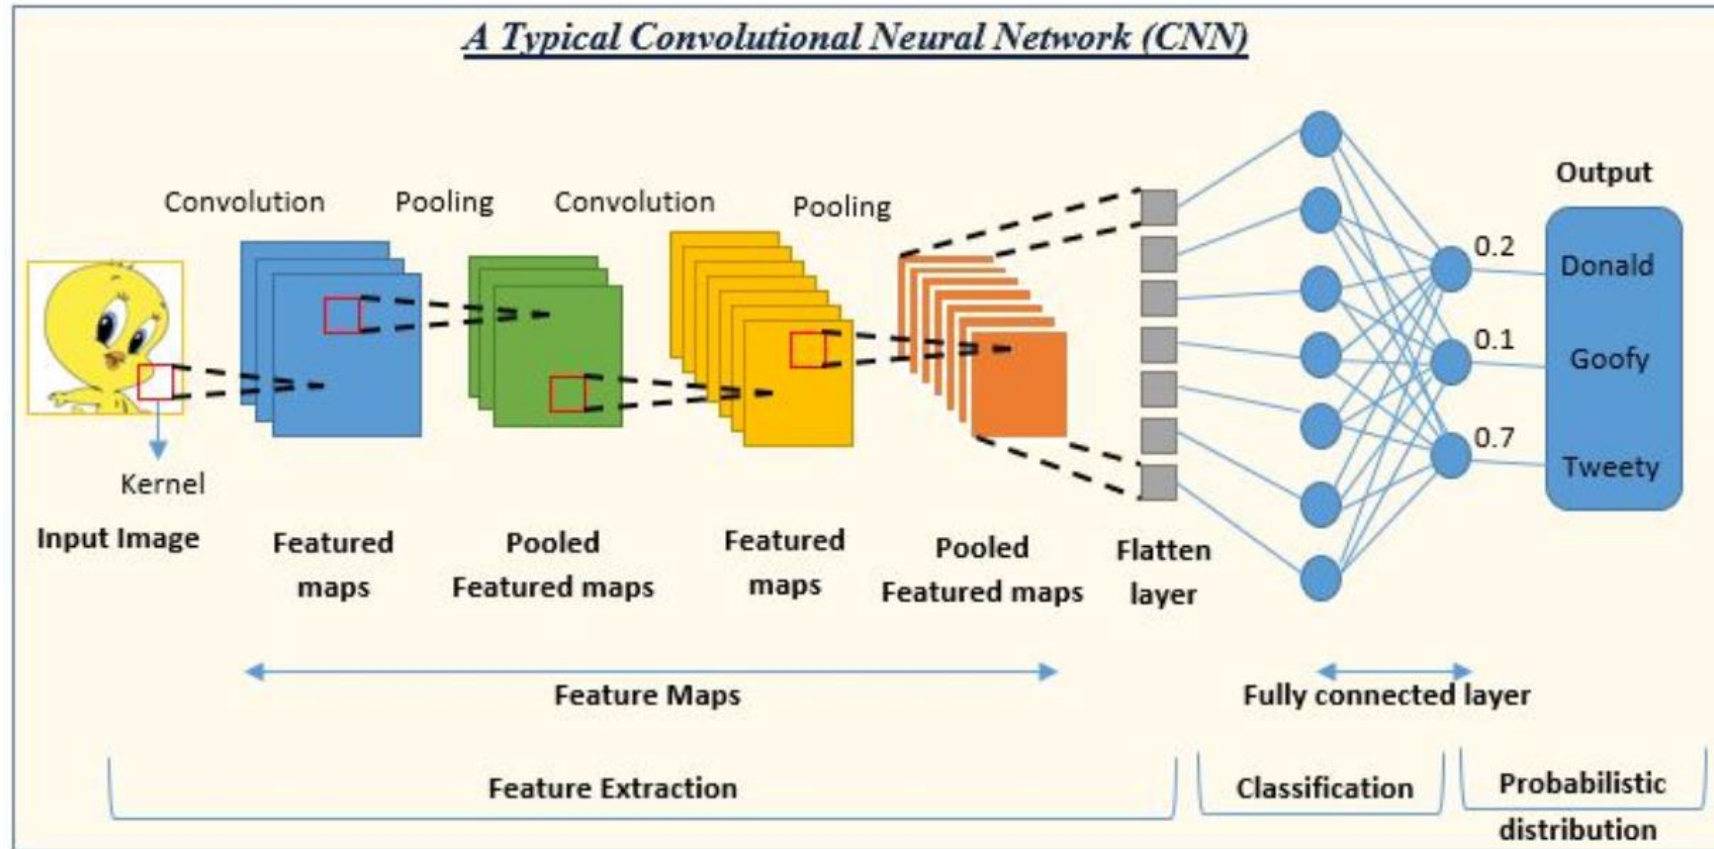

The overall flow of SIFT computation

# Speeded-Up Robust Features (SURF)

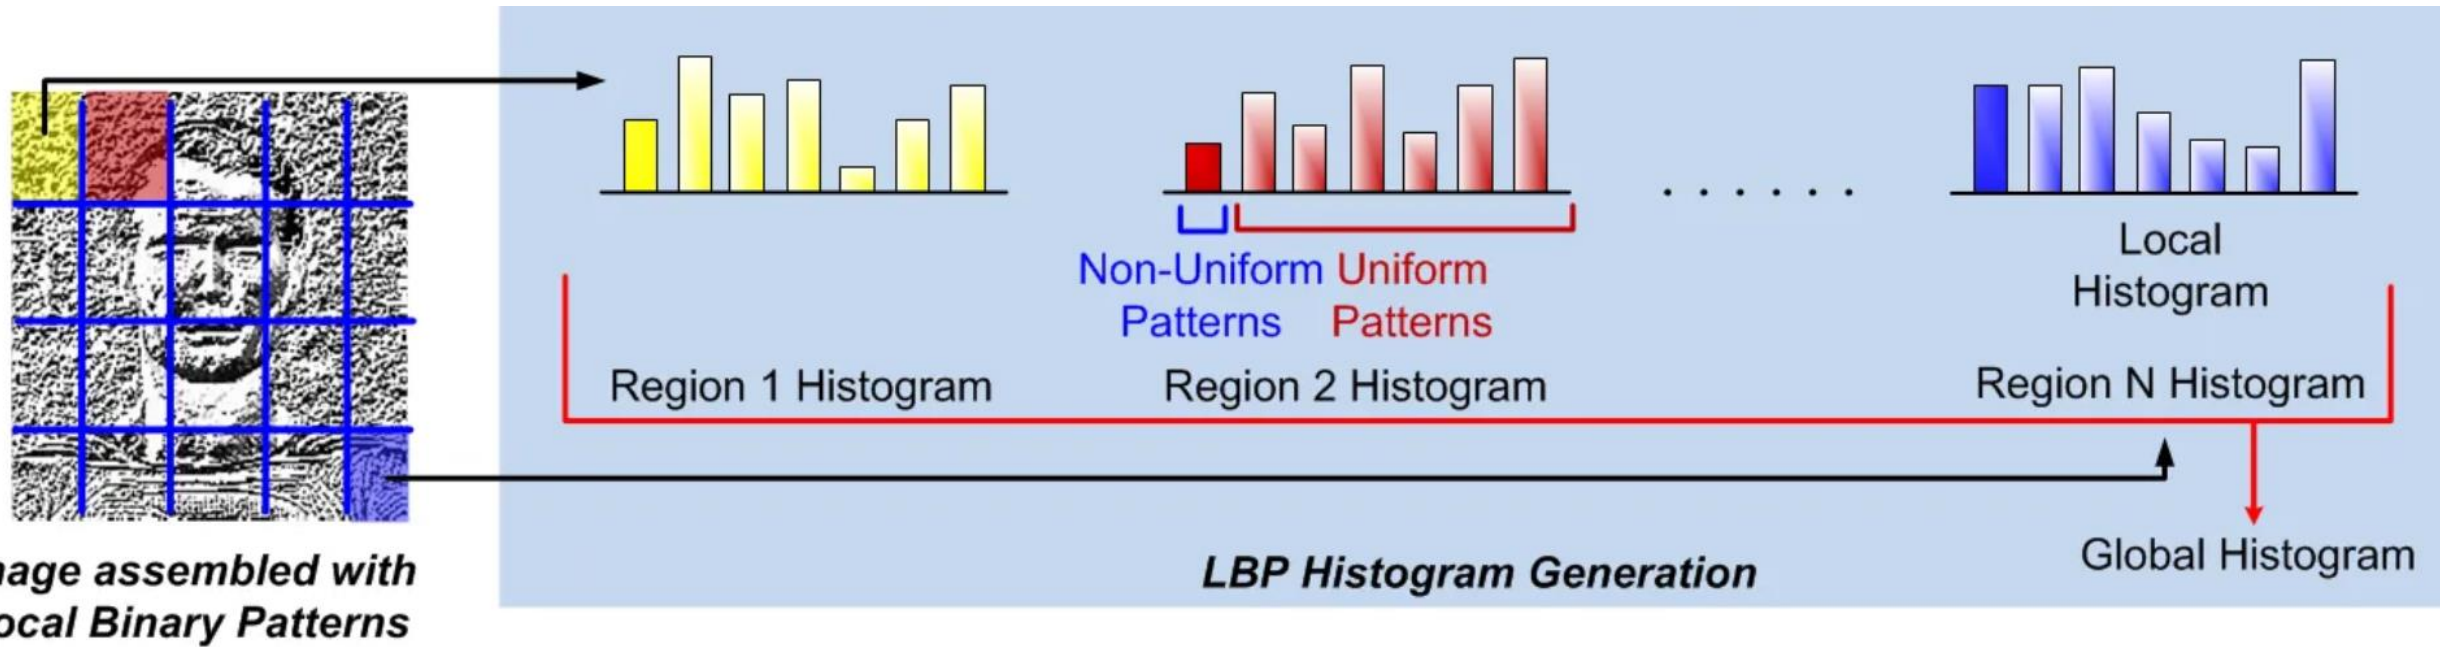

# Convolutional Neural Networks (CNNs)

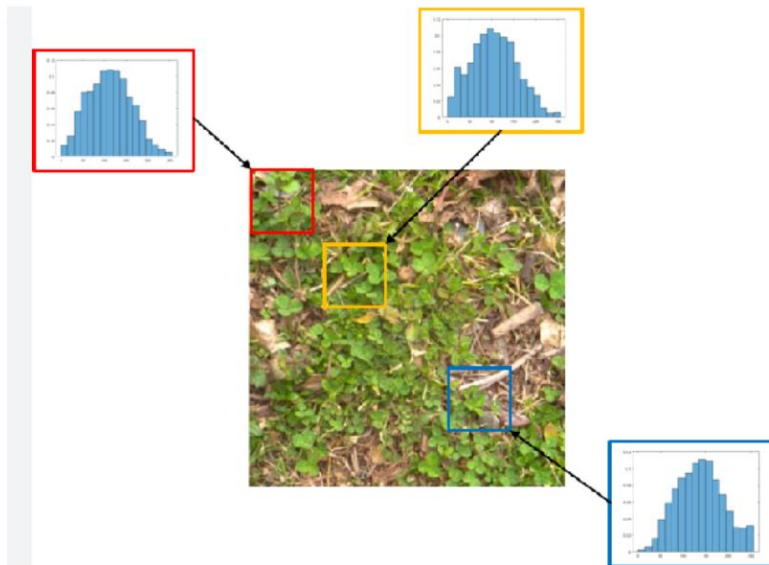

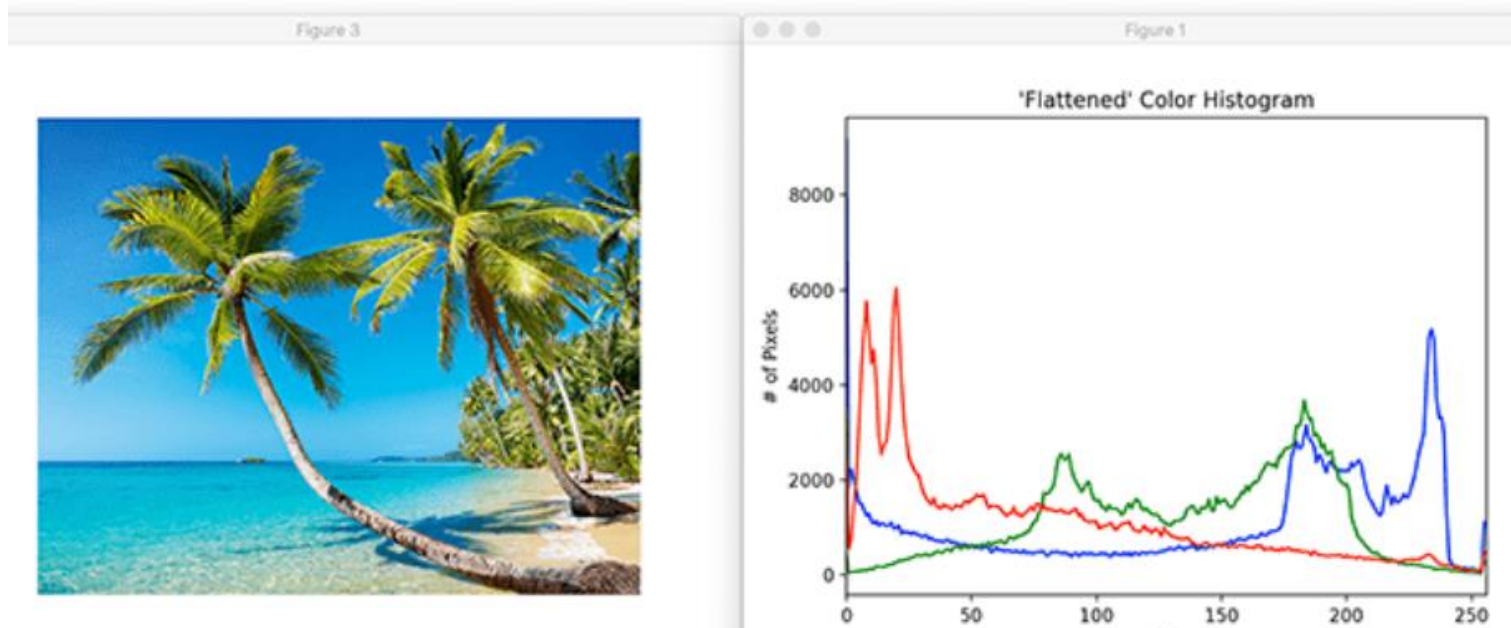

# Local Binary Patterns (LBP)

# Histogram-based Descriptors

# Edge Detection

## Canny Edge Detector Results

Image

$\sigma = 1$

$\sigma = 2$

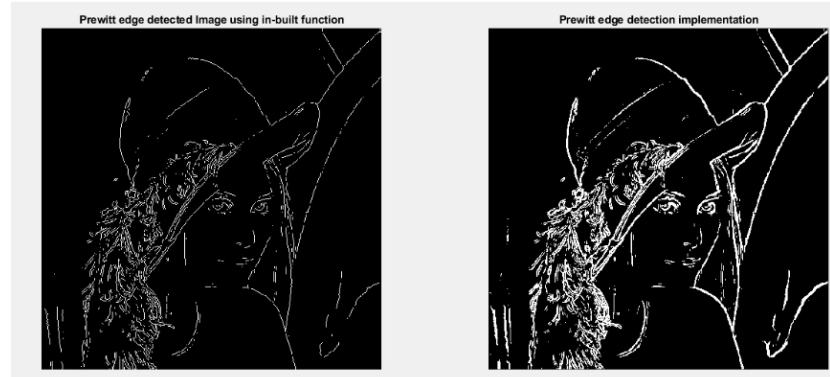

$\sigma = 4$

Enrichmentors

Growing through Excellence over 40 years to become Best in Management

# Split Data

# How to collect and preprocess data

Gather  
relevant  
data

Ensure its  
quality

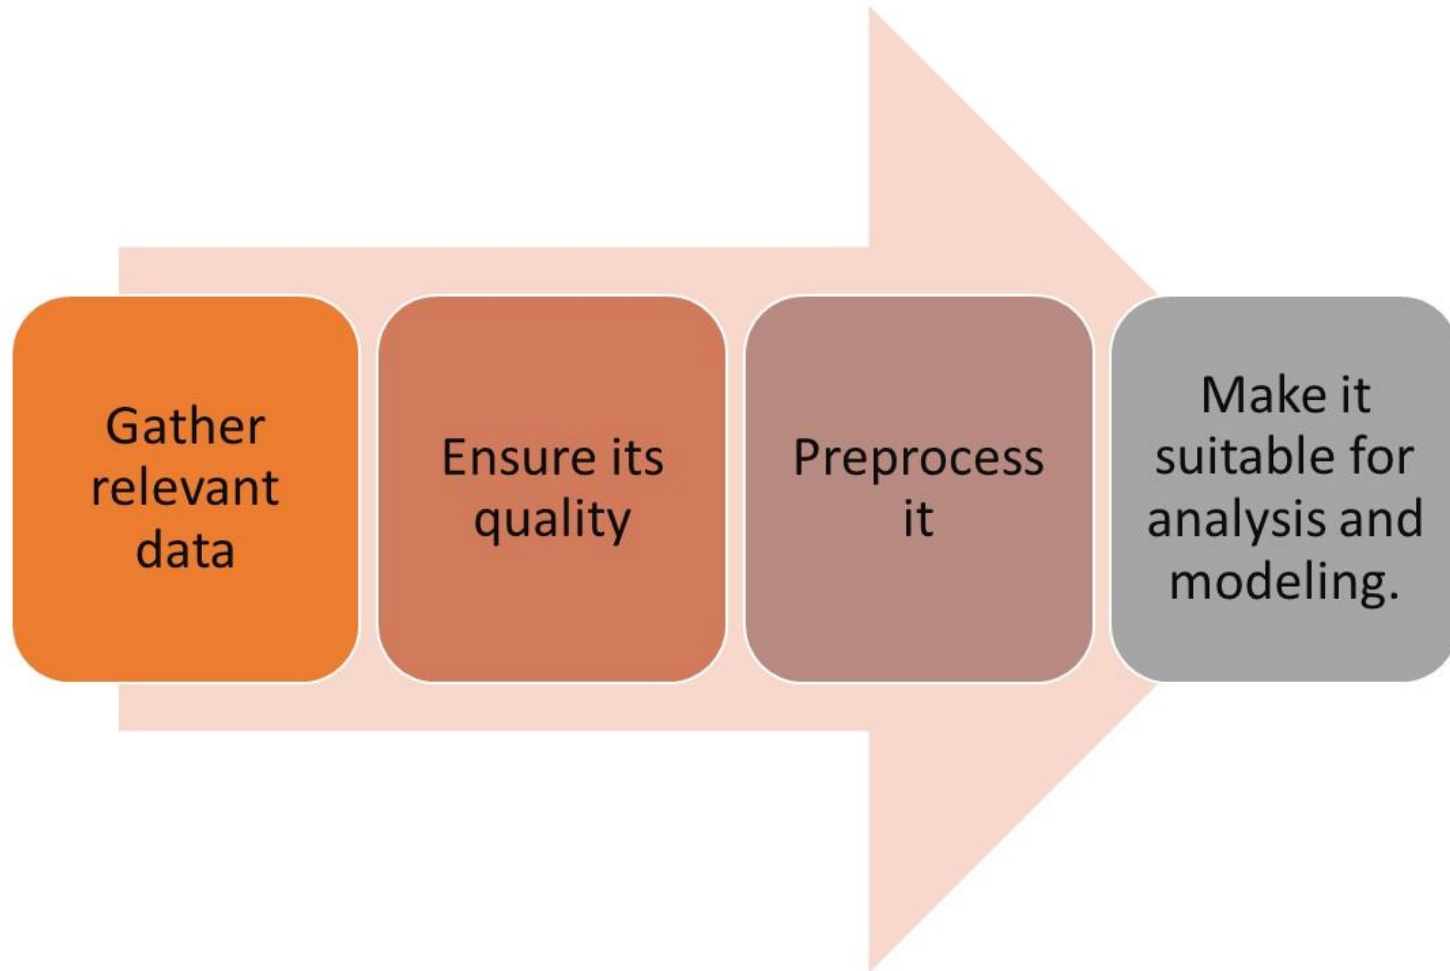

Preprocess  
it

Make it  
suitable for  
analysis and  
modeling.

# What is next?

## How to collect and preprocess data- An Example

# Master in Artificial Intelligence

*Thank  
you*
